

Course Summary

RCPE Professional Level:
Implement WAN Optimization

What We Reviewed This Week

Review Learning Objectives & Capabilities

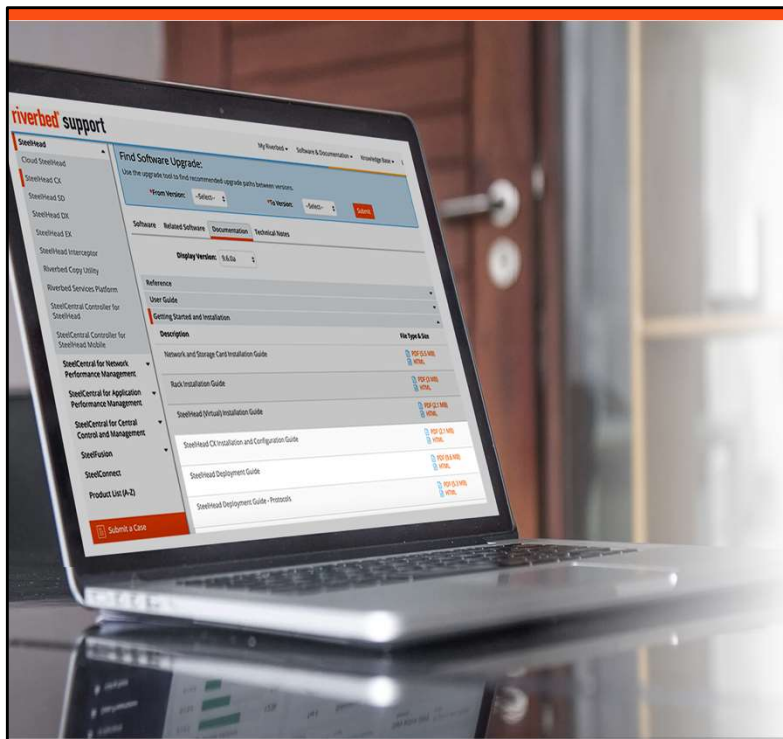

You should now be able to:

- Describe the challenges experienced by hybrid enterprises in the digital age and how WAN optimization can help
- Describe the solution architecture
- Manage your appliances
- Control optimization with in-path & peering rules
- Deploy the SteelCentral Controller for SteelHead
- Optimize HTTP traffic
- Optimize SSL traffic
- Customize Windows traffic in an Active Directory environment
- Optimize other application layers
- Configure SteelHead SaaS Accelerator
- Describe SteelHead cloud solutions
- Monitor and report on solution performance

Riverbed Support & Technical Documentation

- **Global support**
 - 7x24 “follow the sun” support from global support centers
 - Hardware depots around the world
- **Technical support website**
 - <https://support.riverbed.com>
 - Release notes
 - Knowledge base
 - Technical Publications / documentation
 - Asset information (licenses)
 - YouTube site with video HowTo's:
 - <https://www.youtube.com/watch?v=cDyIvEZJ5bE>
- **Professional Services has many offerings to assist you in your deployment and network maintenance**
 - Contact proserve@riverbed.com

Riverbed Training is only a part of what you need to know in order to have a successful deployment.

Consulting Offerings

- Please check out our current service offerings at http://www.riverbed.com/us/products/professional_services/ or contact us at proserve@riverbed.com

3 key guides are also available:

1. The Installation and Configuration Guide
2. The Deployment Guide
3. The Deployment Guide Protocols

Don't forget the CLI guide under *Reference*!

RCPE WAN Optimization Track

Where to Next?

Learning Paths and Certification Tracks

Certification Key Upon Track Completion & Passing Exam(s)

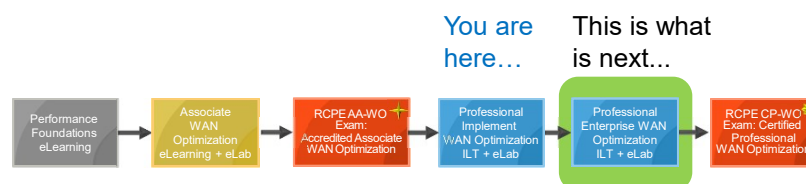

Track Level Specialized
Accredited Associate

Track Level Specialized
Certified Professional

Aggregate Architect
Level Certification

- The RCPE Professional Level: Implement WAN Optimization course is focused on increasing the performance of applications to enhance the user experience and therefore increase productivity.
- The next course is the RCPE Professional Level: Enterprise WAN Optimization course.
- After completing both courses, you can take the RCPE professional level certification exam.

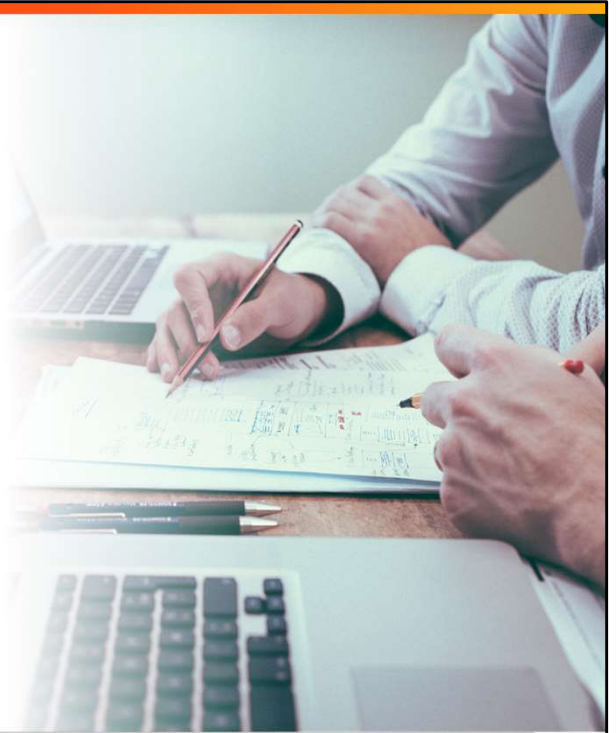

So how do the courses at the Professional level fit together?

- The RCPE Professional Level: Implement WAN Optimization course is focused on increasing the performance of applications to enhance the user experience. and therefore increase productivity.
- The RCPE Professional Level: Enterprise WAN Optimization course is next and expands on the principles of WAN optimization technology that accelerate delivery of applications over the hybrid WAN for the large scale, complex IT enterprise.

After completing both courses, you can take the RCPE professional level certification exam in WAN Optimization. It is currently delivered through Pearson VUE.

To Register for RCPE Certification:

- To register for a Riverbed Certification exam, visit:
